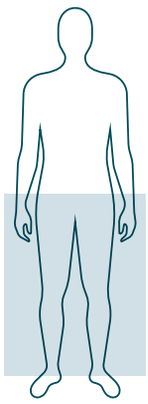
Epsylar+

FOR DIAGNOSTIC AND INTERVENTIONAL ACCESS TO THE PERIPHERAL VASCULATURE



arterial | venous | 4-8F Ø device | radioopaque markers | atraumatic soft tip | hydrophilic coating | kink resistant | max. .035i guide wire 4F | max. .038i guide wire 5F-8F

Epsylar+

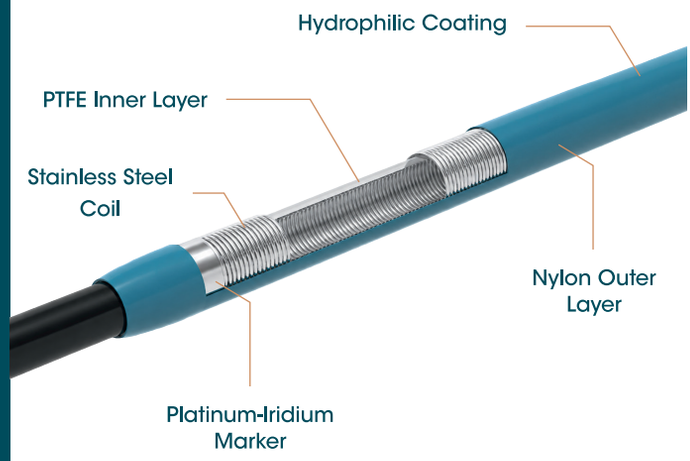
GUIDING SHEATH

Suitable for peripheral interventions, the Epsylar+ Guiding Sheath offers more possibilities as it can be used as an introducer sheath or a guiding catheter. It is designed for the introduction of diagnostic and interventional devices into the vasculature.

SMOOTH TRANSITION AND EASY INSERTION

FEATURES

- Platinum-Iridium marker makes precise locating and measuring
- Coiled stainless steel provides superior torqueability and support
- Hydrophilic coating on distal end reduces vasospasm and smoothens access
- PTFE inner layer allows devices to pass through smoothly
- Silky transition between sheath and dilator minimizes vessel trauma
- Atraumatic tip for safe operation



FEATURES

The detachable hemostatic valve pairs with a wide range of accessories, giving the physician greater operational flexibility
