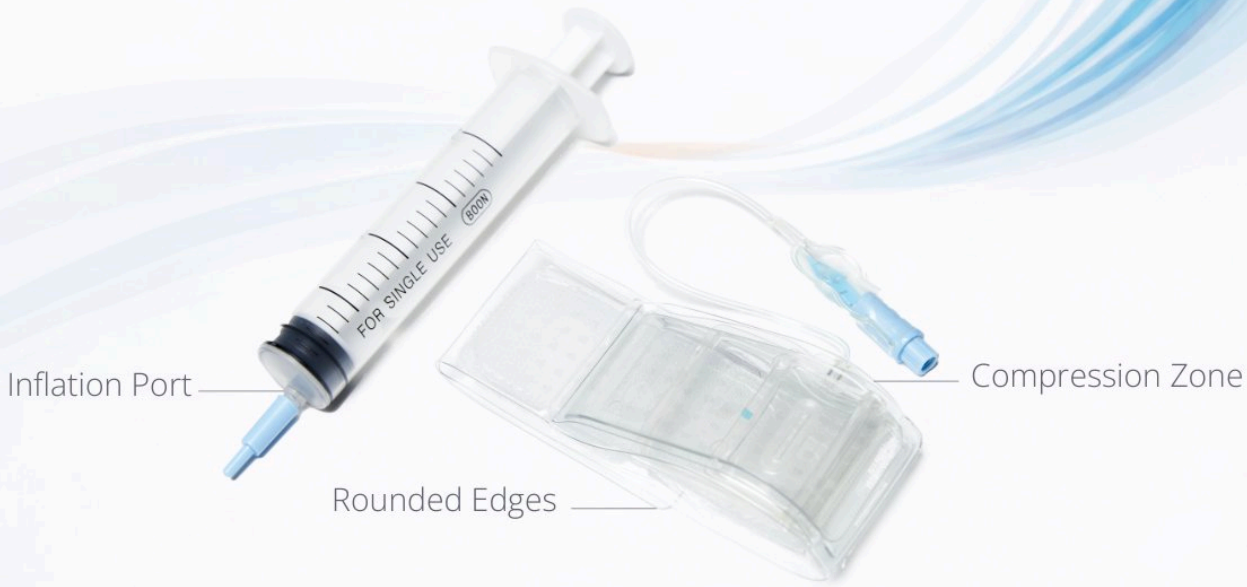
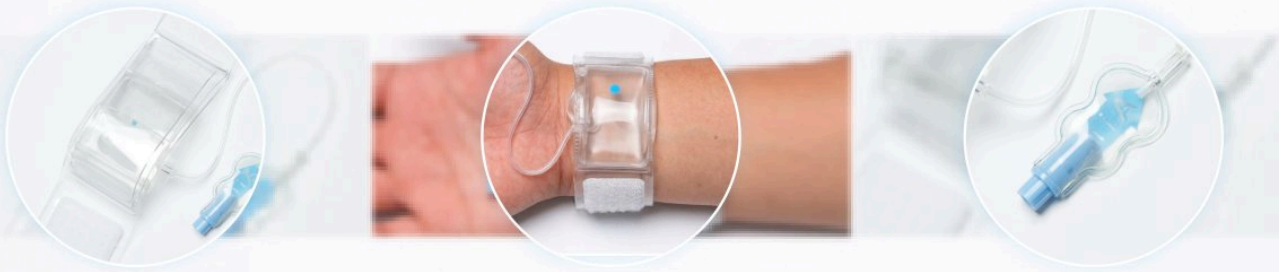
BMC Radial Compression Band

Patent Hemostasis with Precise Control

Controls bleeding following transradial procedures.





VISUAL MONITORING

Transparent design allows continuous monitoring of the puncture site.

PRECISE COMPRESSION

Gradual compression adjustment through controlled inflation.

SAFETY

Maintains arterial patency, reducing the risk of occlusion.

Content	Code
29 cm long × 4 cm wide radial compression band. Includes a polycarbonate syringe for inflation. Nominal Volume: 15 cc Maximum Volume: 18 cc	38-026-01
